

# Gronde Preintonacate

[www.lape-espansi.it](http://www.lape-espansi.it)

Le Cornici per Gronda sono realizzate in EPS alta densità autoestinguente classe E conforme alle norme UNI-EN 13163 e 13501 rivestite con un particolare rivestimento cementizio che garantisce una elevata resistenza meccanica agli agenti atmosferici garantendo un'ottima resistenza nel tempo.

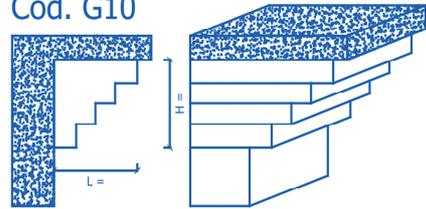

Non sono solo elementi architettonici ma creano anche un ottimo isolamento termico, contribuendo ad un risparmio energetico.

Si possono utilizzare nel recupero di edifici storici riproducendo fedelmente qualsiasi elemento architettonico esistenti.

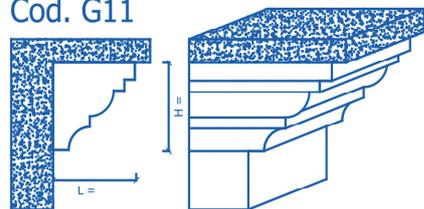

Si realizzano anche su disegno fornito dal cliente
